/thoughtworks CASE STUDY

Learn how Thoughtworks works alongside Pentesterlab to train their software engineers, QA engineers, and security consultants.

ThoughtWorks is a global technology company with offices spread out over different countries. It provides software design and delivery as well as tools and consulting services. The company is closely associated with the movement for agile software development, and it has contributed to a range of open-source products over the years. To help their clients deliver secure products and assess the security of their clients' products and services, Thoughtworks' team needs to stay on top of all the latest attacks and techniques being used by hackers. That's why they use **PentesterLab** to train their security consultants and developers.

THOUGHTWORKS HAS BEEN A CLIENT SINCE **2017**

170 THOUGHTWORKS EMPLOYEES TRAINED USING PENTESTERLAB

PentesterLab enables **Thoughtworks'** team to gain a deep understanding of the common vulnerabilities impacting web applications today and how to exploit them. This understanding plays a critical role in ensuring that they're able to provide their clients with the best advice when developing new products and services. PentesterLab also provides Thoughtsworks' QA team with the knowledge they need to test for common security flaws, allowing them to quickly check for and rectify any vulnerabilities.

The flexible licensing provided by **PentesterLab Enterprise** ensures that the team can learn even during downtime. Access to online labs also minimizes the time spent setting up their testing environment and maximizes the amount of available learning time.
